Regulatory Release Notes

Sona IF573

Version 12.103.0.5

Scope

The Regulatory Release Notes (RRN) provide a summary of the regulatory support for the latest software version showing regulatory changes between the different software versions.

Regulatory Process

Regulatory testing must be carried out using the correct firmware and matching regulatory test utility.

The RRN indicates the countries supported by the radio firmware. Support for a specific country does not indicate that the radio has received modular certification; customer in-product testing may be required to allow shipment to that country. Refer to the product's certifications documentation for all currently existing grants and declarations.

Regulatory support for the specific country requires the use of the appropriate firmware package. Older packages may not be compliant with the latest regulatory requirements; therefore, it is recommended to always use the latest firmware release package whenever possible.

This document provides regulatory release notes for the following Sona IF573 radio software packages:

- Summit-backports-12.103.0.5
- summit-if573-pcie-firmware-12.103.0.5
- summit-if573-sdio-firmware-12.103.0.5

6 GHz Band

- The Sona IF573 is certified as an Indoor Client device in the 6GHz band
  - Outdoor operation is prohibited
  - Direct air interface to other clients is prohibited. This means no master/AP operation is allowed in the 6GHz band
  - Device may only connect to a Low Power Indoor AP in the 6GHz band.
  - Device is prohibited from providing (bridging) a direct connection to the internet to another device via the 6GHz band
- 40/80 MHz channels are supported based on the availability of underlying 20MHz channels

	Channel Numbers	1-93	97-113	117-185	189-233
	Center Frequency	5955-6415	6435-6515	6535-6875	6895-7115

Software Version 12.103.0.5

Version providing support for AU, CA, ETSI (AT, BE, BG, CY, CZ, DK, EE, FI, FR, DE, GR, HR, HU, IE, IT, LV, LT, LU, MT, NL, PL, PT, RO, SK, SI, ES, SE, GB), JP, NZ and US

Regulatory changes since previous release

Updated CLM data to correspond with existing test reports.

- Added entries for full bandwidth HE TB PPDUs for each country.
- Updated legacy OFDM entries.
- Corrected OFDMA entries for EU, AU and NZ across bands.
- Miscellaneous updates for all countries.

Software Version 12.29.0.22

Version providing support for AU, CA, ETSI (AT, BE, BG, CY, CZ, DK, EE, FI, FR, DE, GR, HR, HU, IE, IT, LV, LT, LU, MT, NL, PL, PT, RO, SK, SI, ES, SE, GB), JP, NZ and US

Regulatory changes since previous release

No changes.

Software Version 11.171.0.24

First firmware version adding support for AU, CA, ETSI (AT, BE, BG, CY, CZ, DK, EE, FI, FR, DE, GR, HR, HU, IE, IT, LV, LT, LU, MT, NL, PL, PT, RO, SK, SI, ES, SE, GB), JP, NZ and US

Regulatory changes since previous release

Initial release.
